TRIBUTE TO MARTHA OLIVA, RHIT, CTR

April 25, 1931 - June 11, 2019

Written by: Sally Kruse, CTR

Prior to coming to the United States, Martha obtained a degree in Graphic Design (Asturias, Spain), Major: BA, Minor: Statistics, and was a Certified Public Accountant (Havana, Cuba). She was the Head Accountant, Compañia Nacional de Morteros, S.A. (concrete for construction) February 1959 to February 1960. The Head Accountant, Hospital Division, National Health and Welfare Ministry February 1960 to June 1960. This was followed by the Office General Manager, Hospital Division, National Health and Welfare Ministry July 1960 to September 1962. Director of Medical Records Department and Statistics, University of Havana, School of Medicine "Calixto Garcia" Teaching Hospital from

October 1, 1962 to October 31, 1965. After that she had to abstain from any kind of public activity from November 1, 1965 to December 9, 1971, due to political reasons.

Historically, cancer registrars have overcome adversity to achieve respect and recognition, but nothing like what she went through. Martha had a child who had leukemia and passed away (notice her career changed from accounting to the medical field – she wanted to find a cure). In her position as the Director of the Medical Records Department & Statistics, she began taking meticulous notes that turned into a teaching manual. The government had seized all of her property, including her personal belongings, plus her career and dignity were stripped. She had applied for and received permission to leave Cuba. It was then that Martha decided to send the manual to her relatives in Miami – it was seized and she was told that it was not allowed. Then, she decided to send a few pages at a time to her relatives (this was her life's work).

Martha boarded the plane and even had a seat. Then suddenly a couple of soldiers marched on and announced they needed two seats. They pointed to Martha and another woman and escorted them off of the plane. She suspected that they had opened her letters and considered her a spy.

She was arrested within a few weeks. While walking down the street, Martha was grabbed by two men and thrown into the back of a car. They placed her in a one room, concrete, brightly painted pink, dungeon. The only light came from a crack under her cell door. She kept track of the days by scratching a line on the wall when she heard the soldiers march by her door. Occasionally, the door would swing open and a man with a water hose would spray her and wash out the room (there were no facilities – even the board to sleep on was slanted). It was two weeks before her parents found out that she was a prisoner and she was able to leave solitary confinement.

Martha told me then, she was one of the lucky ones – her prison job was in the kitchen cleaning pots (lots to eat) – they were so big and she was little – that the others would

SunTimes - Summer 2019

hold on to her feet as she scrubbed them. They attempted to brain wash her and her only crime was rejecting Communism.

Martha finally gained her freedom in January of 1972 and was allowed to come to the United States. She kissed the ground in Miami, knowing she was finally free to speak, learn, and be an individual. Something we have all taken for granted.

Martha's first job in the USA was the Supervisor of the Accounting Department, Chem Lab Corp. (Lederle Laboratories) from January 17, 1972 to March 31, 1974. Because of her previous hospital experience, she was hired as Supervisor, Medical Records Department, Jackson Memorial Hospital Miami, Florida April 1, 1974 to January 12, 1976. But she wasn't satisfied until she could communicate in the language of her new country. She learned English by watching TV and became proficient in her new tongue. It didn't take long and Martha obtained Accredited Record Technician (RHIT) in April 1978 and her CTR on the very first test in 1983. She didn't stop there; she became the coordinator of the cancer program at Jackson Memorial Hospital and volunteered her time at the League against Cancer in Miami. When I say volunteer, I don't mean a couple of hours a week, she was there every night.

She was eternally grateful to her new country and profession. She was the treasurer of the National Cancer Registrars Association (NCRA). She not only gave her time, but also helped out financially and she did the same for the Florida Cancer Registrars Association (FCRA). She was the Distinguished Member of NCRA and FCRA (Founding Member) and served as President to both Associations. She believed in giving back what she received and she has given so much.

Martha provided leadership to FCRA in her roles as President Elect, President, and Immediate Past President, Treasurer. In addition to the elected positions, she has served as chair of multiple committees and received the NCRA Distinguished Member award in 2002 and FCRA Distinguished Member in 2017. Martha was instrumental in acquiring the "501(c)(3)" approved by the Internal Revenue Service as a tax-exempt for the FCRA Foundation and has been Treasurer of the Foundation since its inception in 2010. She served in this position with involvement one week prior to her death.

She used her many talents to translate to Spanish - The Professional Review Course for Tumor Registrars: Principles of Oncology, Cancer Program Organization and Management, Biostatistics and ICD-O Spanish for the Medical Science Campus, University of Puerto Rico, San Juan, Puerto Rico in September 1993. Her many achievements and honors are innumerable. She was a friend to everyone she's ever met and is best described as compassionate, loyal, strong, and smart with a heart of gold. Martha will never be forgotten and her legacy will live on – she will be dearly missed and forever in our hearts.

Sally Kruse, CTR
FCRA Treasurer

Those who died
yesterday had plans for this
morning. And those who died
this morning had plans for
tonight. Don't take life for granted.
In the blink of an eye, everything
can change. So, forgive often and
love with a full heart. You never
know when you may not
have that chance again.

MESSAGE FROM THE PRESIDENT

Jennifer Sanky, CTR

Jrsanky2@gmail.com

My Fellow Cancer Registrars, I hope you all are enjoying our bright and long, toasty Florida summer days.

This is my final message to you, as President of FCRA. It has been an honor and a privilege to serve and work alongside such a distinguished group of professionals. My heartfelt thanks go out to each of you, for the opportunity to preside over our local chapter. It has been an amazing and humbling journey.

My sincere thanks to the FCRA Board members, for your dedication and your support in making this professional association such a successful one; we have accomplished much, and I could not have done it without you!

Over the last two years, we successfully navigated our way through some of the most extensive changes our profession has ever seen. We bonded together and built a solid network that allowed us to tackle each challenge that was presented to us, throughout this period. That was a testament of our strength and dedication; *the true definition of Cancer Registrars.*

Together, we've celebrated and welcomed several new registrars here in Florida. We've rebuilt an outstanding FCRA website, updated our association bylaws to encourage new members to volunteer on the board, and experienced continued growth under the direction of our seasoned and dedicated board members.

My journey in this position has allowed me to grow, both personally and professionally. I have had the opportunity to collaborate with, and learn from, many extraordinary professionals in various capacities of the registry field. I had the opportunity to participate in State Presidents' luncheons at the National Cancer Registrars Association (NCRA) annual conferences; one of which was hosted by our own, Barbara Dearmon, in her then role as NCRA President. These luncheons enlightened us about the successes and challenges of other state associations.

Through our accomplishments we have laid the foundation for the challenges that have yet to come, as we forge on into the unknown of ongoing standard changes and the way in which we report data. I have no doubt we will weather the oncoming storms.

In conclusion, I leave with you my charge for 2019, this is the same I had from 2017 – **Be an inspiration to someone so that they will want to join the profession and/or be a mentor to someone to enable them to maximize their full potential.**

With great hope for our future,

Jennifer Sanky, CTR

FCRA President

SunTimes - Summer 2019

Just "What Is" a Cancer Registrar?

Cancer registrars are passionate about quality data and committed to patients they never meet.

Cancer registrars can work in very small places with books on their laps and papers on the floor. Sometimes the office is the size of a closet!

Cancer registrars are fighting the war on cancer one patient at a time.

Cancer registrars' are conscientious and disciplined.

Cancer registrars can pronounce long words with ease and actually know what they mean: Thrombocytopenia, glioblastoma multiforme, oligodendroglioma, or leiomyosarcoma.

Cancer registrars know about body parts people don't even know they have!

Cancer registrars do **not** register patients! They record data.

Cancer registrars can pronounce prostate correct; not pRostRate!

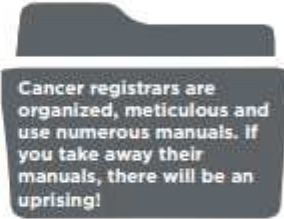

Cancer registrars use their creativity to create charts and graphs with shapes and colors to display their data.

Cancer registrars often are detectives and follow patients from diagnosis through the remainder of their life.

Cancer registrars' data saves lives.

Cancer registrars are organized, meticulous and use numerous manuals. If you take away their manuals, there will be an uprising!

Cancer registrars' are one of the first to learn about new tests and treatments for cancer patients.

Cancer registrars network with their counterparts at other hospitals. Registrars become friends with their neighbors even if the hospitals are competitors. If they ever meet, no one ever looks like they expect.

Cancer registrars are familiar with change. Change in advances in cancer diagnosis and treatment but also changes in standards and coding rules.

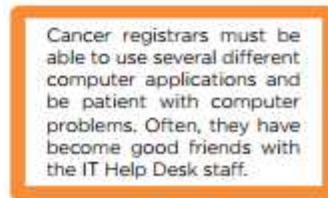

Cancer Registrars are required to know all of the diagnostic tests and modalities of treatment for each cancer site and each stage of disease. Registrars often feel like part of the medical team because they know what is expected.

Cancer registrars can resurrect an expired patient, at least in their database. Who knew they had special powers!

Cancer registrars understand cancer registrars, even if no else does!

Cancer registrars must be able to use several different computer applications and be patient with computer problems. Often, they have become good friends with the IT Help Desk staff.

Cancer registrars often have more work than can be completed but they come back the next day! Their level of commitment is profound.

FCRA EDUCATION FOUNDATION

Jamie Suarez, RHIT, CTR

jksuarez0619@yahoo.com

July 29, 2019 Orlando, FL

Your FCRA Education Foundation is holding a **Silent Auction** on Monday July 29, 2019 during the FCRA Annual Meeting.

We invite you to bring an item to be donated. This could include gift certificates, coupons, or items from any friend or local establishment. Let your imagination soar! If you and your cancer registrar friends would like to make and donate a gift basket, these are very popular with your fellow registrars.

DONATE YOUR UNWANTED HOUSEHOLD ITEMS: Do you have items that you no longer want or that no longer fit your current décor such as gently used household items which might include wall decorations, lamps, tablecloths, or items you'd like to re-gift? Consider donating a few of these items to the FCRA Auction.

SOLICIT DONATIONS: When you are at your favorite restaurant or store, or if you know the owner or manager, consider asking them to make a donation. Examples include:

- ◆ **Retail Donations:** Local boutiques, gift stores, grocery stores, independent toy or drug stores, hardware stores and state-wide movie theaters. Don't forget the wine & cheese stores or accessories such as wine glasses, glass markers, bottle openers, etc. Auction items may also include sports equipment, building supplies, tools, and non-perishable grocery items; really anyone who sells goods can be asked to donate actual items and/or gift certificates
- ◆ **Restaurant Donations:** Statewide restaurant chains may provide gift certificates or coupons
- ◆ **Does your hospital have giveaways?** These items may be grouped together with others to make one interesting "collection". Maybe an "office packet" of pens, pencils, letter openers, etc. Check with your Marketing Department to see if they have any "left-over" promotional items they can part with.

No donation is too small!! Several small items may be "bundled" together with other like items to make an interesting basket.

This is a great fundraiser for the FCRA Foundation. Money raised will be used for educational activities for FCRA Members.

For additional information, assistance or helpful information on identifying donations, call or email **Gayle Clutter at 727-954-6221** or gclutter@tampabay.rr.com.

We are in need of volunteers to help us set up and monitor the donations. If you're willing to help, please contact Gayle Clutter or Jamie Suarez (jksuarez0619@yahoo.com).

Jamie Suarez, CTR, RHIT

FCRA Education Foundation Liaison

SunTimes - Summer 2019

BY-LAWS CHAIR

Mayra Espino, BA, RHIT, CTR

mbectr@gmail.com

*bylaws
changes*

Welcome summer! Most of you know how much I enjoy summer; a fun time to take a walk, especially on any beach. For many years I have enjoyed serving as your Bylaws Chairman, which consists of interpreting and communicating the FCRA bylaws to you and giving them attention when needed. It is important to be ready for change and expect it with a positive welcome!

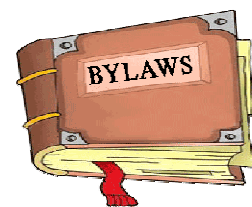

The FCRA Bylaws go through annual review and are shared amongst the FCRA board so important decisions can be made regarding updates and revisions to areas that may be outdated. After further review of the current bylaws, there was one area in particular

which was in need of being updated, the *FCRA/FCDS Liaison* position. The position was first initiated, many years ago, where the concept was tied to other positions covered by FCRA in C-Crab. These positions have since become obsolete and no longer a part of the cancer registry. Therefore, the *FCRA Liaison* was no longer involved as before or in need of an appointment by the Governor, as it is stated in the current bylaws. Discussion ensued regarding this position, which evolved into other revisions made by the board as it is evident to keep with current trends in the profession.

The Executive Board suggested the following changes be proposed to the 2016 Current FCRA Bylaws regarding the FCRA/FCDS Liaison Position:

- 1) **Proposal Modification: CHANGE the (4) four year term to a (2) two year term.**
- 2) **Proposal Modification: CHANGE the verbiage in section V. STANDING COMMITTEES REMOVE “approved by the Florida State Office of the Governor.”**
- 3) **Proposal: ADD “The FCDS Liaison will also function as the Co-Chair of the FCRA/FCDS Task Force along with a member from the FCDS.”**

These proposals will be discussed at the FCRA Business meeting which will be held on July 29, 2019 in Orlando. This position will not be associated with C-CRAB. The application for approval from the Governor has been eliminated. In addition, the position of the *FCRA/FCDS Liaison* will be a *Presidential* appointment. This position was established to have a communication channel between FCRA and FCDS through a liaison that represents FCRA. The intent of the position is to communicate effectively with open harmonious channels between each other. If any registrars would like to share ideas or thoughts with the FCRA/FCDS Liaison, they will be able to do so through the FCRA website once it is up and running.

Most importantly, the “FCDS Liaison will also function as the co-chair of the FCRA/FCDS Task Force along with a member from the FCDS”.

We expect to see you at the annual business meeting as these bylaws may be amended by two-third (2/3) vote of the voting members present. Voting is conducted at any business meeting of FCRA, provided that the amendments have been proposed by the Executive Board, Standing Committee, or an active member of FCRA in good standing. All proposed amendments will be submitted to the Bylaws Committee for review.

As your Bylaws Chairman, I will be responsible for ensuring that a copy of the proposed amendment has been submitted in writing and made available to every FCRA member, one month prior to the business meeting at which time it will be voted upon. Please watch for correspondence from the FCRA Executive Board and your Bylaws Chairman for information regarding proposed changes.

Mayra Espino, BA, CTR

Bylaws Chairman

SunTimes - Summer 2019

2019 FCRA PROGRAM COMMITTEE

**2019 FCRA Program Committee
41st Annual Conference**

“Take a Ride Learning About New Trends in Cancer Care”

We are excited to host our conference at the Rosen Centre Hotel in Orlando, Florida: “Theme Park Capital of the World.” Come explore it all — theme parks, shopping and dining; there’s no wrong way to experience Orlando.

The FCRA Program committee has planned a great educational program to promote continuing education and training for cancer registry professionals. NCRA Program Recognition has approved thirteen (13) CE hours which includes “Category A” specific topic(s) of: directly assigned stage, extent of disease, and/or site-specific coding principles.

Visit FCRA’s website at www.fcra.org to register online and download the brochure. The conference will feature topics to enhance your skills and role as a Cancer Registrar in the profession. Some keynote topics to be highlighted include; management of pancreatic cancer, breast cancer genetics and risk assessment, colorectal accreditation, the digital age of tumor boards, 2018 updates and WHO classification schema for brain tumors. Learn about the upcoming trends in our industry from local speakers and industry professionals and discover how you can master the changes in your profession. The FCRA Foundation will be hosting a silent auction to raise funds in support of education.

The Rosen Centre offers outstanding accommodations and is conveniently located only fifteen (15) minutes from downtown Orlando. The Florida Cancer Data System (FCDS) annual educational conference will follow the FCRA annual conference at the same hotel. For additional information on guest room reservations, visit the hotel website at <https://www.rosencentre.com/> or call for reservations at 1-866-996-6338.

The FCRA program committee is looking forward to greeting all of you this year in Orlando.

July 29th & July 30th

Standard guestroom rate is \$125 single/double

Group Code: FCRA/FCDS

Deadline to make hotel reservations is Friday, July 5, 2019

REGISTRATION

FCRA members \$225

Non-Member \$300

F/T HIM Student \$150

To register online, visit www.fcra.org or make checks payable to FCRA and forward to:

Maximize the potential of your cancer registry

For 25 years, ERS has observed how cancer registrars interact with their data. CRStar by ERS is the culmination of that experience. We combine our technical resources, cancer registry expertise and customer support services with one goal in mind ... better outcomes for our clients.

- Securely access and work with your registry data from any web-enabled device
- Dashboards reports provide managers and administrators with an instant snapshot of key performance indicators
- Export registry data into Journey Forward's Survivorship Care Plan builder
- Concurrently monitor the latest Quality Measures
- Expanded data set efficiently collects information to assist in monitoring both Cancer and Breast Program Standards
- Import data for Casefinding and Follow-Up from multiple sources
- Present data in 3D graphs, charts or customizable spreadsheets using our powerful reporting module

To learn more about ERS & CRStar by ERS please visit our website at www.ers-can.com

THE FCRA EDUCATIONAL FOUNDATION ANNOUNCES

THE DOLORES KRULL MICHELS-HARPER, CTR MEMORIAL FUND

On November 25, 2018 in Instow, England, the Cancer Registry community lost one of its GREAT ONES Born Dolores Jean Krull in Pittsburgh, Pennsylvania on November 29, 1936 to Frank and Genevieve Krull, Dolores was the oldest of four siblings. She met her 1st husband, Bud Michels in High School and they married in 1957. They had three children: Susan (deceased in 1962), Jodi and Bud, Her husband passed away in 1983.

Dolores had a distinguished career as a CTR serving as Manager of the Division of Patient Registries at **Allegheny General Hospital** in Pittsburgh, Pennsylvania. She was also an adjunct instructor in Registry Administration at the School of Health Related Professions at the University of Pittsburgh. Dolores was instrumental in getting NTRA's participation in evaluating the curriculum for this formal education program.

One of her most unique experiences was that, following the death of her 1st husband, in 1990, she moved to [Riyadh](#), Saudi Arabia to become the Cancer Program Director of **King Faisal Hospital and Research Center**. It was here that she met her 2nd husband, Charlie Harper. They retired to Instow, England in 1997.

Before moving to Saudi Arabia, Dolores was active in many Cancer Registry Associations including NCRA (then NTRA) that awarded **the NTRA Distinguished Member** to her in 1992. Dolores was a founding member of the NTRA and served as President during 1981-1982. Dolores was also active in the Pennsylvania Tumor Registrars Association serving on many committees and as President (1975-76). She was also a Liaison to the American Joint Committee on Cancer (AJCC) and served on several committees and working groups for the ACoS COC. In addition, she was an active volunteer for her local American Cancer Society. Dolores' publications were numerous; many have appeared in the pages of The Connection and The Abstract.

Dolores was also a good friend to FCRA, choosing Orlando for the location of the annual NCRA conference in 1982 when she was NCRA President. She also participated as faculty for several FCRA Educational conferences and was chosen as an **Honorary FCRA Member** in 1989. To honor all of the contributions Dolores made to the education of cancer registrars throughout her career, the FCRA Education Foundation has created the DOLORES KRULL MICHELS - HARPER MEMORIAL FUND.

The FCRA Education Foundation was founded as a vehicle to build much needed funding to support education of Cancer Registrars to ensure that the quality of the cancer data collection and analysis will continuously improve through the education in Cancer Registry Management and its evolving practice.

Please help us recognize Dolores' many contributions to the cancer registry profession and assist us in our primary role to support the advancement of that profession and the quality of the information generated by registry data through education and research by making a gift to the DOLORES KRULL MICHELS -HARPER MEMORIAL FUND. The FCRA Education Foundation is a 501© (3) organization so all donations are tax deductible.

Please send donations to the DOLORES KRULL MICHELS -HARPER MEMORIAL FUND to FCRA Educational Foundation c/o
